

**MISSION PROFILE:**

Used by goTenna Pro and Pro X users operating in comms-denied environments. The tether replaces the need for a bluetooth connection, and provides reduced radio signature detection and increased runtime for up to 18 hours of operation. The rugged, sealed, shielded cable clips onto a stainless steel interface bracket installed on the radio, providing USB/Power connection to the Glenair connector on the Juggernaut.Case QD cable/case assemblies.

**TEST DATA:**

Immersion, Connection To Radio: IP67 ..... (1 meter, 30 min)

(\*See goTenna specs for radio immersion\*)

Cable Pull Force 1 ..... (25lb Clip to Radio)

Cable Pull Force 2 ..... (15lb Glenair)

Dimensions (Tether body) ..... 2.55"H x 1.5"W x .995"D

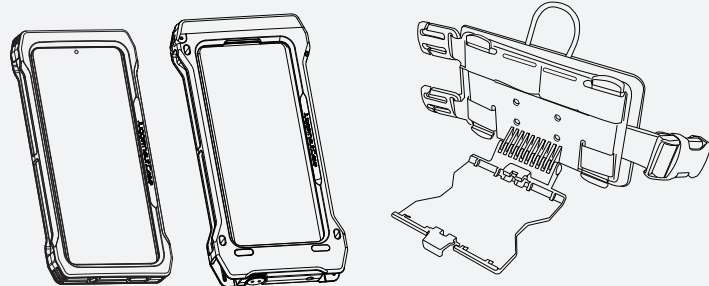

Weight (Tether+Cable) ..... 73.02 grams

Colors ..... Flat Black

**COMPATIBILITY:**

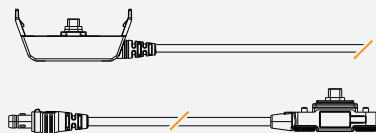

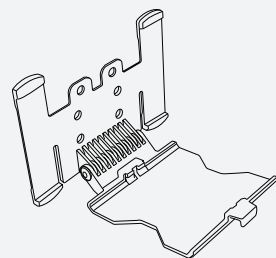

Fits only goTenna Pro and goTenna Pro X models

Pair with Juggernaut.Case IMPCT or SLEEV phone case
